

# SILVER YARN GARMENTS

# WHO WE ARE

**Skafit works for your health!** Skafit is committed to helping people with chronic skin conditions lead a better and more comfortable life. We do this by developing, promoting, and providing high-quality garments made with silver yarn, which has a unique antibacterial effect and noticeably contributes to improved temperature and blood flow regulation. Our product range helps with rheumatic support, chronic skin issues, cold sensitivity & circulation problems, diabetic care, skin ulcer support and fungal protection.

# SILVER YARN GARMENTS

## Used for

The garments are designed for people with chronic skin conditions where reduced circulation and cold related complaints play a role. Silver yarn has a unique antibacterial effect that helps reduce bacteria, fungi and odors, while supporting skin hygiene. It helps to keep your blood flowing, this is important for people with cold sensitivity, circulation problems, diabetes and sensitive skin. In addition, it contributes to effective temperature regulation by helping the body stay comfortably warm without overheating.

## Range

The Skafit range of silver garments is designed to be highly functional and comfortable. Seams and pressure points are avoided wherever possible to prevent further stress on the skin. This makes the garments particularly suitable for sensitive skin.

### The range includes:

- Shirts
- Pants
- Socks
- Gloves
- Hats

## How to wear

Silver yarn garments works best when worn as a base layer. For optimal effect, it is important that the silver fits snugly against the skin, maximizing the conductive and reflective properties of the silver. For extra insulation against the cold, wearing

additional layers over the garments is recommended.

## Temperature regulating

Silver is a special material in our thermal silver garments that supports circulation and the skin. The silver yarn works to reflect your body heat back to the skin, reducing heat loss and keeping you warm. Because silver conducts heat efficiently, it spreads warmth quickly over the skin.

## Antibacterial

Another important property is its antibacterial effect. Silver can inhibit bacteria and fungi, reducing the risk of infections. It also wicks away moisture, keeping the skin dry. This combination of properties provides warmth, circulation, moisture regulation, and hygiene, protecting the skin effectively.

## Washing instructions

Thermal silver garments can be easily machine washed at 40°C. Avoid using fabric softener or detergents containing softener, as this can insulate the silver yarn and reduce its effectiveness. Air dry only; do not use a tumble dryer. Do not iron the garments, as this can damage the silver yarn.

# SHIRTS

Skafit shirts with silver yarn combines advanced technology and comfortable fit, reflecting body heat to regulate temperature while offering antibacterial protection. The skin-friendly and label-free design, with flat seams, makes it a perfect addition to any underwear range or base-layer range.

Shirts with silver yarn short sleeve

Shirts with silver yarn long sleeve

## Features

- Suitable as underwear
- Reflects body heat
- Temperature regulating
- Antibacterial effect
- Flat seams / No labels
- Skin friendly
- Materials: 86% PA, 12% Silver metallized, 2% EL
- Colours: Black, White
- Sizes: S, M, L, XL, XXL, XXXL
- Package: 1 piece per packaging unit

# PANTS

Skafit pants with silver yarn offers an effective temperature regulation and antibacterial protection. Its skin-friendly design with flat seams and no labels ensures comfortable fit, making it an essential addition to any underwear or base-layer range.

Pants with silver yarn short

Pants with silver yarn long

## Features

- Suitable as underwear
